

## Switch to When I Work in days

### The problem

After outgrowing their previous scheduling system, Elephants Deli only had two weeks to implement new software and train almost 300 people.

### The solution

Because When I Work is easy to use and focuses on employees first, it was no problem to switch everyone over in a matter of days.

Time to  
transition staff

2 weeks

**Roz Catania**  
Operations Trainer

After 40 years in business, Elephants Deli had grown from a single location to seven retail stores, five delis, two restaurants, a central production kitchen, an online store, and a headquartered office that handled catering and delivery.

With 18 scheduling managers and 270 employees, they'd outgrown their old system, but were under a two-week deadline to replace it.

Roz chose When I Work because of the simple, employee-friendly interface that made it a snap to get everyone using the system. Now all employees are on a single platform for scheduling and communication, which makes workplace operations and collaboration better.

The Elephants Deli staff is happier and more productive, with the ability to find coverage for shifts and share availability across locations.
