

Improve team communication with mobile

The problem

The inability to access software remotely made employee scheduling cumbersome and hard to execute.

The solution

Use When I Work to have scheduling software that is just as mobile as the staff.

Employee engagement 85%

Jenessa Williams
Chief Nursing Officer and Administrator

Jenessa Williams manages scheduling for 120 employees across three care sites at Saint Joseph Hospital, each with their own independent schedule. She needed scheduling software that she could access anytime, from anywhere.

FAVORITE FEATURE

 TEAM MESSAGING

“When I Work is user-friendly for all, managers and associates included. We have multiple roles across several care sites and When I Work makes scheduling and communicating a breeze.”

Not only did When I Work streamline the scheduling process, it made scheduling mobile and had a major impact on team communication. Jenessa found that the Team Messaging feature added unexpected efficiency since employees and managers could communicate with each other seamlessly. And it also created more cross-functional and departmental alignment.
