

# Schedule multiple locations in less than an hour each week

## The problem

Creating and managing a paper schedule for two offices became complex and time-consuming.

## The solution

Use When I Work to maintain a smooth workflow between the locations and keep a busy practice organized.

Time saved on scheduling      Hours each week

**Dr. Lisa Alvetro**  
Owner

Prior to using When I Work, employees at Alvetro Dental wrote down their shifts and corresponding location, as well as time off and vacations. The system of paper scheduling and manual entry became complex, laborious, and time-consuming.

Dr. Alvetro implemented When I Work and the results have been incredible. Staff have access to the app, which helps them stay on top of their schedule between the two locations, which allows the practice the flexibility to schedule appointments as far in advance as they like.

When I Work has saved everyone time and effort, and has helped to create a more harmonious work-life balance at Alvetro Orthodontics. Because the software is intuitive, easy to navigate, it meets the needs of staff and multiple locations. They've taken their scheduling time from hours down to just 30 minutes each week. Best of all, her employees are set up to succeed.
