

## Keep your staff connected

### The problem

Metro Dentalcare relied on two different calendars for scheduling, time tracking, employee availability and training. The system wasn't user-friendly or shareable.

### The solution

Use When I Work to simplify scheduling into one easy-to-share solution that employees love.

SCHEDULING

**Talitha Rieken**  
Manager

Talitha Rieken is the manager of Metro Dental Care, and one of her many responsibilities is staffing and scheduling for the thriving 40-location dental practice. She used two different Outlook calendars for employee scheduling, tracking hours, managing employee availability, accountability, and training. The system wasn't shareable or user-friendly.

After implementing When I Work, employees across the practice have received the software with positive feedback. The biggest impact has been how well it helps her manage flex-time workers—keeping everyone on the staff connected. Plus the scheduling capabilities now extend to multiple locations, so Talitha can save time and eliminate manual data entry.

When I Work offers online help that's quickly and readily accessible to staff, which means Talitha's no longer the point person for questions. Now she has more time to focus on building and managing her team to achieve new goals.
