

## Save 10 hours every week

### The problem

Kaiser Permanente Woodland Hills spent 40 hours across eight managers every week building the schedule in a custom spreadsheet—often duplicating shifts and making schedule visibility difficult for employees.

### The solution

Use When I Work to build a schedule that's easier to use, easier to communicate, and easier for everyone to see, especially those employees who are mobile.

Hours saved  
every week

### FAVORITE FEATURE

SCHEDULING

**Michael Bruse**  
Managerial Senior Consultant

Kaiser Permanente Woodland Hills is a part of the Kaiser Permanente healthcare network, and prior to using When I Work, a custom spreadsheet was causing major scheduling headaches. The team kept duplicating shifts because they were difficult to see once they were assigned. Scheduling 500 employees took eight managers over 40 hours each week.

*“This program gets very high ratings for friendliness. It’s very effective for communicating to employees that are mobile.”*

Michael chose When I Work because of how easy and intuitive the app is to use. His team has saved over 10 hours every week and they’re able to communicate better, fill shifts seamlessly, and just make scheduling easier for everyone. Plus, Michael has seen even more value in using When I Work, saving on labor costs, improving team communication, and increasing employee satisfaction.

Now Michael and his team can focus more time on providing the best possible patient care at Kaiser Permanente Woodland Hills Medical Center.
