

Make the employee schedule in 87% less time

The problem

A rigid system made it hard to customize the software to business needs and weekly scheduling difficult.

The solution

Use When I Work to simplify and customize scheduling, making it faster and easier to track employee availability.

Time savings
on scheduling

87%

DJ Cannon
Hospital Manager

Prior to using When I Work, DJ was using a different scheduling software to create the weekly schedule at Banfield, but it wasn't meeting the needs of his staff, and he found it difficult to keep track of employee availability.

DJ chose When I Work because of how simple and efficient the software is to use. He really appreciates how they can customize the interface to the specific needs of their business.

Since using When I Work, DJ has reduced his time spent building the schedule each week by 87%—now spending just 30 minutes creating the weekly schedule. He's also seen increased employee accountability and satisfaction, labor cost and time savings, cross-functional and departmental alignment, and improved team communication.

With the time DJ saves every week, he's able to focus on Banfield's mission of strengthening the human-animal bond through care, education, and relationships while keeping pets well through preventative care.
