Prevent payroll errors

The problem
Manual data entry for payroll took hours—and then it took even more hours to double check every entry for errors.

The solution
Use When I Work and the integration, RUN Powered by ADP® to automate payroll, save time, and prevent errors.

AMERICAN SELF STORAGE

Payroll accuracy	Better
Employee accountability	Increased

FAVORITE FEATURE

RUN POWERED BY ADP®

Barb Mills
Accountant

Before using When I Work and RUN Powered by ADP®, Barb entered hours manually into ADP and spent hours double checking all of her entries for human errors. Now she saves valuable time, prevents clerical errors, and has a smooth payroll process—building trust with her employees.

"I've processed payroll using RUN Powered by ADP®, and it's perfect—there are no glitches."

Another benefit of using When I Work is that American Self Storage has reduced no-shows and increased customer satisfaction. With 10 locations, sometimes managers wouldn't be aware of no-shows for hours, resulting in a poor customer experience. Since switching to When I Work, Barb knows exactly when and where an employee is clocking in and out from, thanks to GPS enforcements. The new process builds trust and accountability with her employees while giving her peace of mind that shifts are covered.

With the extra time Barb has now, she's able to pay closer attention to details that save her business money, like managing overtime and labor budgets.
